It hits the nerves and the underlying muscle group. This unity is a combination of TENS, EMS, IF (Interfering) and RUSSIAN which can stimulate TENS, EMS, SI (Interferential) and Russia, which can be used to stimulate muscle and pain relief. used to stimulate muscle and pain relief. The device is supplied with four. The device is equipped with four channels of sound control, each independent of each other. control channels, each independent of the other. A Un electrode pair electrode can be connected to each sodium channel. peer can be connected to each sa channel. The intensity level is controlled by upush buttons. controlled by press µ. Chapter 1: 1GENERAL DESCRIPTION: General Page 6 Page 6 5 Chapter 2 5 INTRODUCTION O EXPLANATION O This Is . The pain is important; The pain is important; without it, abnormal µ can pass without abnormal conditions µ not being detected, damage or they are not µ in vital parts of our body. Not detected, causing damage or µ on vital parts of our body. Even bothering you a warning sign necessary for trauma or malfunction in the body, although pain is a warning sign necessary for trauma or malfunction of the body, nature may have gone far in its project. body, nature may have gone too far in your project. Beyond its diagnostic value, prolonged pain serves no useful purpose. diagnosis, prolonged persistent pain does not serve any useful purpose. Pain does not begin until it begins until the encoded message travels to the brain where it is decoded, analyzed and reacted. Analyzed, it is made to react. The pain message travels from the injured area along the small nerves leading to the spinal cord registration. It was through small nerves that went to the spinal cord. Here the message here is exchanged by different nerves that travel through the spinal cord to the brain. attaches to different nerves that travel through the spinal cord to the brain. The painful message is then interpreted, sent back and the pain is felt. The message of pain is then interpreted, returned and the pain feels. TENS EXPLANATION EXPLANATION TENS EXPLICACIN Stimulation of the Transcutaneous Electric Nerve is a stimulation of the free electronic nerve non-invasive and transcutaneous is a non-invasive, compound-free, which controls the pain. method to control pain. TENS uses small electrical impulses sent through TENS uses small electronic impulses sent through the skin to the nerves to modify your pain claim. skin on nerves to change your perception of pain. TENS does not cure any TENS which does not cure any physiological problem; physiological problem; only helps to control pain. only helps to control pain. TENS doesn't work because TENS doesn't work for everyone; for all; In most patients, it is effective in reducing or reducing pain, however, in most patients it is effective in reducing or eliminating pain, allowing normal activity. remove pain, which allows the return to normal activity.
